

THE GERMAN RAILWAY SOCIETY

FOR ENTHUSIASTS AND MODELLERS OF GERMAN RAILWAYS

PROSPECTUS

Depot Dügelshaven

Doug Tompkins

MEMBERSHIP

We offer annual membership worldwide. We have implemented a change in our status to a private limited company, giving added protection to our members.

JOURNAL

Our full-colour magazine *Merkur* is published quarterly and we cover all periods of the prototype, from the earliest to the current era. We try to circulate as much information on news, developments and stock changes as possible. There are articles on prototype and modelling subjects as well as information about the Society, exhibitions, news of the model trade and a 'sales and wants' section, free to members. There is also an e-group available to members.

ABOUT US

Formed in 1981 and now incorporated as a Company Limited by Guarantee, The German Railway Society (GRS) was set up to

- generate interest in German railways
- provide an English language source of information
- encourage modelling of the prototype

01 1509 Zittau April 2015

Alan Monk

LOCAL GROUPS

The Society has a number of local groups in the UK where there are a sufficient number of interested members living within a reasonable distance of each other. Meetings are organised by the members of the group and cover all interests. Some local groups are forming 'twinning' links with railway/model railway clubs in Germany. If you decide to join us and indicate an interest in a local group, the Local Group Co-ordinator will contact you to let you know if one exists in your area.

ICE 3 Dortmund Hbf April 2015

SOCIETY PRODUCTS

The Society sells a range of products including steam- and modern-era DVDs and books about German signalling. They are sold from the Society's stand, which attends exhibitions, or by mail order from the Society Products Officer. Back issues of *Merkur* may also be purchased from the Society Products Officer subject to availability.

HELP SERVICE

The GRS offers a write-in Help Service for those new (and not so new!) to German railways. This is a useful way of answering those small but important questions such as why, how and when!
